

**Stars No More**

blackford cry :  
Mercury worry -  
stars no more!

observatory obscure :  
Venus vanished -  
no moon !

astronomer stroke:  
Mars missing -  
no light !

planetary panic:  
Jupiter pooped,  
qué quasar.

constellations vacant:  
Saturn spurned -  
no Way.

galaxies waned:  
Uranus gone -  
we alone ?

black plughole ?  
Pluto blotted,  
black blank.

oops! lens-cover on:  
euphoria for  
sky at night !
